## Semi-Motorized Fluorescence Microscope

The BX53 semi-motorized fluorescence microscope can be configured to meet virtually any research need. It supports a wide range of fluorescence imaging applications and offers advanced features for enhanced operating ease and process flexibility.

### Observation Images

Muscle Tissue (Fluorescence)

Lung Tissue with EML4-ALK fusion gene  
(Haemotoxylin and Eosin Stain)

### Specifications

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                              |
