FV5000

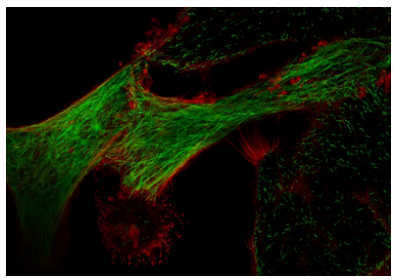

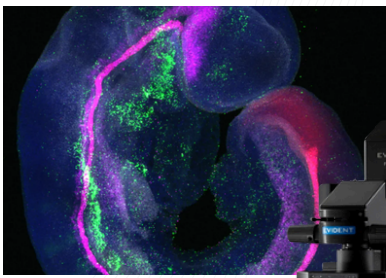

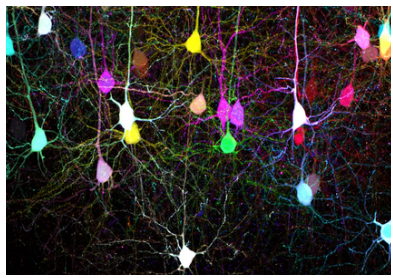

Confocal Laser Scanning Microscope

The FLUOVIEW FV5000 is a platform built for every dimension of discovery. From crisp, photon-level quantitation at the surface to deep, multiphoton imaging in thick, living samples, the FV5000 captures biology at every scale. SiVIR detectors deliver exceptional sensitivity, a wide dynamic range, and photon-level precision, while 2K resonant and 8K galvo scanners freeze motion in real time for exceptional clarity. Smart automation simplifies setup and workflow and ensures consistent, reproducible results. Combining advanced detection, intelligent design, and intuitive operation, the FV5000 makes powerful imaging more accessible than ever, helping researchers capture more detail, more reliably, in less time.

Specifications

Scanner	Galvanometer scanner	64 × 64 – 8192 × 8192 pixels, 0.2 μs/pixel – 1000 μs/pixel
	Resonant scanner	512 × 512 pixels, 1024 × 1024 pixels, 2048 × 2048 pixels
	Field number	20 (for both scanner types)
Spectral confocal detector	Detector	SiVIR detector (cooled SiPM, broadband type/red-shifted type)
	Maximum channels	Six channels
	Spectral method	VPH, detectable wavelength range: 400 nm-900 nm
Laser	VIS laser	405 nm, 445 nm, 488 nm, 514 nm, 561 nm, 594 nm, 640 nm
	NIR laser	685 nm, 730 nm, 785 nm
	Laser power monitor	Built in
Image	High dynamic range photon counting (1G cps, 16-bit)
